ACCESSIBILITY AUDIT REPORT

Nordlys Living

nordlysliving.eu · Shopify · Copenhagen, DK · 6 May 2026

CONFORMANCE SCORE

78

/ 100 · EN 301 549 · WCAG 2.1 AA · ▲ +7 in 6 weeks

3 critical · 7 serious · 12 moderate · 31 resolved

Executive summary

Over six weekly scans, Nordlys Living's accessibility has improved from a conformance score of 71 to 78 against EN 301 549 / WCAG 2.1 AA. The store is partially conformant: most journeys meet the standard, but three critical issues remain open at checkout — the highest-risk journey under the European Accessibility Act.

A theme update on 12 June briefly reintroduced two critical checkout issues; both were caught the same day and are documented in the evidence log. We recommend resolving the three open critical issues before the next quarterly review to reduce regulatory exposure, and maintaining continuous monitoring to catch future regressions.

Open issues (5)

SEVERITY	ISSUE	WCAG	JOURNEY
● Critical	Payment amount has insufficient contrast against its background	1.4.3	Checkout
● Critical	Card-number field is missing an associated label	1.3.1	Checkout
◆ Serious	“Apply discount” control is not keyboard operable	2.1.1	Cart
▲ Moderate	Decorative product thumbnails expose redundant alt text	1.1.1	Product
✔ Resolved	Checkout form fields now have associated labels	1.3.1	Checkout

Remediation roadmap

Phase 1 · now	Fix the three critical checkout issues — order-total contrast, card-number label, and the keyboard-operable country dropdown. Checkout is the highest-risk journey under the EAA.	~1 day
Phase 2 · 2 wks	Resolve the seven serious issues across the cart and product journeys, including the keyboard-operable discount control and missing focus indicators.	~3 days
Phase 3 · 6 wks	Work through the twelve moderate issues, then publish the updated accessibility statement and seal it to the evidence log.	~5 days

Appendix — evidence trail

The complete register — 6 sealed entries, newest first. Each SHA-256 covers the entry's payload and the hash before it, so any alteration breaks the chain from that point on; the hashes are reproduced in full for independent verification.

DATE	EVENT	SHA-256	PREV
26 Jun 2026	Scan Weekly scan complete — conformance 78/100, 5 journeys, 50 criteria.	9f2c1a7e…b41d	3ad07c94…8e12
19 Jun 2026	Fix Card-number label added at checkout (ISS-4822) — verified.	3ad07c94…8e12	77be00a1…5c9f
12 Jun 2026	Regression Regression detected after Prestige 2.4 update — order-total contrast 2.1:1 at checkout.	77be00a1…5c9f	b0d3f5aa…21e7
12 Jun 2026	Decision Developer notified (Prestige theme) — remediation requested, sealed.	b0d3f5aa…21e7	c41e9b02…7a08
22 May 2026	Fix Checkout form labels added (ISS-4102) — before/after evidence attached.	c41e9b02…7a08	1002dd7f…3b64
15 May 2026	Scan Weekly scan complete — conformance 75/100.	1002dd7f…3b64	genesis
